

# SUPERPERSE<sup>®</sup> E-THREE

## AQUEOUS SYSTEMS

**SUPERPERSE<sup>®</sup> E-THREE** is an environmentally friendly pigment wetting, dispersing, and stabilizing agent for all types of pigments in most aqueous systems.

- Low VOC
- Alkylphenoethoxylate free
- Used as a single dispersing additive for multiple pigment dispersing requirements
- Does not promote foam, therefore the need for defoamers in the grind phase is minimized
- Can be used as the sole dispersant or as an additive to improve resin-based dispersions
- Effective with all types of pigments
- Maximizes color development, improves wetting, provides viscosity stability, increases color acceptance
- Will not diminish the integrity or water resistance of the final coating or ink system

**Recommended Usage Level:** When used as the sole wetting and dispersing agent add 5 - 10% based on the weight of the pigment. When used to improve resin-based dispersions add 2-3 % based on the weight of the pigment.

Add to water, co-solvent or vehicle prior to the addition of pigment. Optimum levels should be determined through laboratory testing.

### Typical Properties:

% Active Solids	44.0
Gardner Color	10 Max
Weight per Gallon (Lbs.)	8.50
Specific Gravity	1.02
pH (10% Aqueous Solution)	10.0
